Catarrrh Cannot Be Cured
with LOCAL APPLICATIONS, as they
cannot reach the seat of the disease.
Catarrrh is a local disease, greatly in-
fluenced by constitutional conditions,
and in order to cure it you must
take an internal remedy. Hall's Cat-
arrrh Cure is taken internally and
acts thru the blood on the mucous sur-
faces of the system. Hall's Catarrh
Cure was prescribed by one of the best
physicians in this country for years. It
is composed of some of the best tonics
known, combined with some of the
best blood purifiers. The perfect com-

Catarrh Cure is what produces such
wonderful results in catarrhal condi-

COUNTY COURT.

Business Transacted Light and Com-
pleted in One Day.

The October term of county court
convened and closed its labors in one
day. The usual reports were made by
the various officers and the reports
were accepted. Numerous bills were
ordered paid.

The report of the Highway Com-
mission shows that about \$16,000 has
been spent since the July report and
that a little over \$90,000 is still remain-
ing in the hands of the commission-
ers. As \$50,000 was set aside as a
general upkeep fund by special act of
the legislature, only about \$40,000 re-
mains to be spent on road construction.
The report of Judge S. N. Smith
shows that only \$2,900 of railroad
bonds are outstanding and that about
\$11,000 have been retired since the
July term of court.

Lewis Ford was released from road
work and poll tax.

J. H. Henry, A. F. Dixon, C. J.
Wheeler, Jere Morrow, and J. R. Par-
ham were elected notaries public.

The tax levy committee is: R. A.
Powell, J. A. Frey and C. H. McCoy.
Poorhouse committee: Wm. Woody,
J. F. Brown, Jas. Tucker.

The bond of County Judge S. N.
Smith was approved by the court and
accepted. He was allowed ex-officio
fees for the year to the amount of
\$200. Sheriff J. S. Garrison was al-
lowed ex-officio fees for the year to the
amount of \$300.

SAVE SEED CORN NOW

When Thoroughly Dried Freezing Will Not
Injure the Germ.

Remember now your experience
with poor seed corn last spring.

It is a safe bet that your community
suffered a loss of thousands of bushels
due to poor stands as a result of plant-
ing dead seed. You suffered your
share of the loss.

Now is the time to prevent the
same thing again next spring. Store
your seed now in a dry place. Keep
ears separated so that they will dry
out quickly. String them up in your
garret or other well ventilated place
where they will be protected from
the weather and the rats. Dry seed
corn is not injured by freezing.

Damp seed is killed. It dries slowly
in the crib and is likely to be injured
there by freezing, as it was last
winter.

Play safe. Pick out an ample supply
now and store where the ears do not
touch each other. It is little trouble
but will pay well.—J. C. McAnis
Specialist in Agronomy Division of
Extension, University of Tennessee.
